Practical 1: Generate a First RetailPulse Report

Related topic: Introduction to IBM Cognos Analytics - Reporting | Tool: IBM Cognos Analytics | Package: RetailPulse

Objective

Navigate the Cognos Analytics Reporting environment and generate a running list report against the RetailPulse Sales package.

Materials Required

IBM Cognos Analytics access, RetailPulse Sales package, a personal content folder to save into.

Step-by-Step Procedure

#	Action performed	Observation
1	Opened Cognos Analytics and selected **New > Report** from the welcome screen.	Report authoring (Reporting) studio opened with the template gallery.
2	Chose the **RetailPulse Sales** package as the data source.	Source tab populated with the package namespaces, query subjects and measures.
3	Picked the **List** template from the gallery.	Blank list object placed on Page1.
4	From the Source tab dragged **Region**, **Product Category** and **Sales Amount** onto the list.	Three columns created; headers show the data item names.
5	Clicked **Run** (HTML) in the toolbar.	Live RetailPulse rows rendered in the browser, no placeholder text.
6	Saved via **Save as** with the name **RetailPulse - First Sales Report** in **My content**.	Report appears in My content; reopening it re-queries live data.

Output

RetailPulse - First Sales Report (Run, HTML)

Region	Product Category	Sales Amount
North	Electronics	$128,045.26
North	Apparel	$18,755.95
North	Home	$30,836.74
North	Grocery	$4,383.18
South	Electronics	$115,638.57
South	Apparel	$21,138.95
South	Home	$34,193.47
South	Grocery	$5,182.32
East	Electronics	$93,802.00
East	Apparel	$17,751.67
East	Home	$47,887.93
East	Grocery	$7,140.66
West	Electronics	$90,324.79
West	Apparel	$19,285.86
West	Home	$37,959.33
West	Grocery	$6,661.45

Fig 1.1: Running list report showing Region, Product Category and Sales Amount from the RetailPulse Sales package.

Expected Outcome Check

✓ Report canvas shows live RetailPulse rows rather than placeholder text.

✓ Columns are correctly labeled: Region, Product Category, Sales Amount.

✓ Report saved in the personal folder and reopens with the same live data connection.

Conclusion

A three-column running list report was created from the RetailPulse Sales package, executed against live data, and saved to the personal content folder. This report is the starting point for Practical 2.

Note: screens and figures are illustrative renderings built on a consistent sample RetailPulse dataset (report date 15 October 2026, current quarter Q4 2026: 1 Oct to 31 Dec).
